**Re: Dr. Gregory Sholette**

To whom it may concern,

I am writing to express my support for Dr Gregory Sholette's work as a scholar and artist. Dr Sholette's contribution to the field of art, which combines theorisation around labour, politics, activism and capital, is significant, making him one of the essential thinkers of our time.

SIRIUS and Dr Sholette have been collaborating on various activities, including organising the inaugural SIRIUS Summer School in 2022, residencies in 2022 and 2023, and research towards an exhibition in 2024.

This presentation shows new work made by Dr. Sholette in response to the context in which SIRIUS operates as well as a selection of other of his past work, enabling European audiences to engage with his practice through a fresh perspective.

SIRIUS promotes quality, innovation and diversity across all art forms with a political focus. An association with Dr. Sholette is an effective way to help cement this vision in Ireland.

Kind regards,

Miguel Amado  
Director
